Must-Know Infirmary Earns Magnet Redesignation

The Magnet designation is the highest honor an organization can receive for professional nursing practice. It recognizes excellence in nursing leadership, clinical practice, innovations and positive outcomes. The Infirmary was Arkansas's first hospital to achieve Magnet status in 2013. The current redesignation continues until 2022. As a Magnet institution, it employs the highest standards of quality and ensures that patient care and safety are the top priority.

Kristina Garcia was named a Service Hero at the Infirmery for displaying the value of **COMPASSION**.

In February, several members of the lab lost their home in a fire. Within 24 hours of the fire, Kristina organized a help fund with members of radiology and GI lab, collecting \$330.

She then went to Target and bought gift cards for each member of the family to help with immediate needs, such as toiletries or undergarments. Kristina is always looking to make patients, families and coworkers as comfortable and respected as possible.

Connie Treat was named a Service Hero at the Infirmery for displaying the value of **COMPASSION**.

Connie did not think twice about watching another nurse's patients so the nurse could go check on her mother-in-law, who had been transferred from the floor to the NSICU. When the nurse realized how sick her mother-in-law was, Connie took over care of her ICU patients until the end of the shift. Because of Connie, the nurse was able to speak to her mother-in-law one last time before she coded and was intubated, and her mother-in-law was able to tell her she loved her.
